Summary:

* Power point review of the Survey Monkey that was sent to districts. There was still the discussion about the lack of information that is getting out to districts. The committee believes that more C&I folks from districts should be involved in these committees.

* Discussion occurred regarding: methods of communication in districts; process of reporting 10-11 placement data; purpose/responsibility of each committee; value of MDTP as a diagnostic tool; various utilizations of placement process (other grades).

* Parking Lot topics from original meeting were reviewed and edited – no need to focus on items yet.

Key Points for...

District Office Administration: The Placement Committee was interested in the wide range of responses to the Survey Monkey. Curious as to why not all districts knew about the Placement Process – how is communication getting to school sites?

Site Administration: Site needs to make sure that counselors, vice principals, teachers and parents have the information regarding the placement process.

Site Staff: Be aware of how teachers play a role in the placement process.
